4. Accommodations
5. Budget overview

## Introduction

We are The Newf Society, a small association with ambition.

About 10 years ago we started this with a group of fanatic waterworkers.

We were the first to organize a waterworkday in 2013.

Despite being a Newfoundland association, we have allowed other breeds to join, which makes us the biggest waterwork association in The Netherlands at this point.

We have a good relationship with other associations in the Netherlands.

In 2022 we like to organize the International competition. Herewith the script for 3 and 4 september 2022, to be held on location "Camping de Betuwe" in Kesteren, The Netherlands

Hoge Dijkseweg 40, 4041 AW Kesteren

 +31 (0)488 48 14 77

Location:

This location has an open water at the campsite. You will enjoy the fine location for camping with tent, caravan or camper. There also are cabins and safari tents, with a view over the water. Even campers are available where dogs are allowed.

There's free Wifi.

There is also a brasserie, bread service in the morning, mini grocery store, bike rental and a possibility to use washing machines.

A fantastic place for our water competition. Distance 210 m. length, 50 m. wide, 8 m. depth.

Map of the campsite:

Kesteren is a place close to Nijmegen and Arnhem.
